ABOUT ME

I am a Computer Science Student, and I aspire to become a Software Engineer. I want to build Softwares or help build Softwares that will solve many obvious problems we have in this world. When I'm not coding, I'm with my family. I am open to learning new things. My Hobbies include:

1. Coding
2. Reading
3. Discovering New things
4. Attempting to Solving real World Problems
5. Traveling

PERSONAL PROJECTS

- **Tekisite.com** is a blog I created in 2015 when I was learning web development. It was created with Wordpress. I have later created several wordpress websites since then.
- **Famgift** is an Idea I started working on to make international gifting easier for people abroad. I created it with Wordpress Woocommerce, I also integrated online payments like paypal and Braintree Credit Card payments. I also ensured security for online payments.
- **Codecentre.net** is a project I'm working on that will allow new programmers ask questions or take advantage of already answered questions. It will help in the development of any project they might be working on. Answers will be in multiple programming languages to help those who know only one language learn another language easily. There would be rewards for people who answer correctly, multiple times. The business model is to attract users with free answers and later build a way to make money later on.
- **Millewears LLC** is a Fashion Brand I co-created to make Fashion more simple and accessible to millennials. I designed the website with bootstrap and wrote some javascript for functionality.
- **Weandel LLC** is a new company I co-created. It will "help businesses cope with Technology". Our services include Web development, Branding, Marketing ETC.
Clients includes:
thevaloircollection.com, bazzdom.com, tibratechindustries.com, etc
- **tibratechindustries.com** is a construction website I created for a friend. It was created with wordpress cherry framework with the help of a ready made theme.
- **bazzdom.com** is a blog I created for my colleague. It was created with wordpress, with the help of a ready made theme.
- **thevaloircollection.com** is a hair vendor website I created with the help of bootstrap, HTML, CSS, and javascript.
